

RETRO-R®

The Retro-R® Panel is an excellent choice for builders looking to prolong the life of their building. Retro-R® panels allow the existing R-panel roof or wall to stay in place, which saves on labor costs while minimizing the chance for water entry into the building during the roofing process and provides for a safer work environment. The Retro-R® panel has rib spacing 12" on center with a rib height of 1 1/16". The existing lap screws must be removed from the R-panel roof before the Retro-R® panels are installed. The screws that attach the existing R-panels to the purlins do not have to be removed. The Retro-R® panels are attached with special shoulder screws that fasten through the existing R-panel major ribs and into the existing purlins. Once the Retro-R® panels are installed, new lap screws are installed through the Retro-R® ribs and the existing R panel sidelaps.

Product Specifications

Applications: Roof and Wall
Coverage Widths: 36"
Rib Spacing: 12" on center
Rib Height: 1 1/16"
Minimum Slope: 1/2: 12
Panel Attachment: Exposed Fastening System
Gauges: 26 and 29 (standard)
Finishes: Smooth (standard); Embossed (optional)
Coatings: Galvalume Plus®, Signature® 200

Features and Benefits

Saves time and labor
 No tear-off needed
 Lightweight
 Drip Stop backer, protects panel from scratching and acts as vapor barrier
 Durable, baked-on paint finish
 Wide variety of Cool Metal colors brochure
 Premium Paint Warranty – 40Yr. Film Integrity

CATEGORY	CHARACTERISTIC	TEST METHOD	PURPOSE	RESULT
STRUCTURAL	Negative Wind Loads	AISI S100	North American Specification for the Design of Cold-Formed Steel Structural Members	See Section Properties and Allowable Load Table Section
	Gravity Loads	AISI S100	North American Specification for the Design of Cold-Formed Steel Structural Members	See Section Properties and Allowable Load Table Section
ROOF LISTINGS	Roof Performance - Florida Approval	ASTM E 1592	Florida product approval is the approval of products and systems which comprise the building envelope and structural frame, for compliance with the structural requirements of the Florida Building Code.	See FL#21121.1
